Jarad earned B.S. and M.S. degrees in Chemistry at the University of Pennsylvania in 2009. While at Penn, he worked in the lab of Professor Larry Sneddon on the synthesis of ultra-high-temperature ceramics from polymer precursors and on the development of new electrolytes for lithium ion batteries. He obtained his Ph.D. in Chemistry from the University of California, Berkeley in 2015 under the guidance of Jeffrey Long. At Berkeley, Jarad investigated the storage and separation of gases in metal-organic frameworks.

Following graduate school, he was a postdoctoral fellow with Chad Mirkin at Northwestern University where he used DNA to assemble responsive materials composed of inorganic nanoparticle building blocks.

In January 2018, Jarad began his independent career as an Assistant Professor in the Department of Chemistry and Chemical Biology at Harvard University. His research group applies the tools of synthetic chemistry and nanoscience to design materials that address basic science challenges in energy and sustainable development, with a particular emphasis on the development of chemical strategies—drawing heavily from coordination chemistry—to manipulate entropic effects, phase transitions, and porosity at different length scales in metal-organic materials.

PROFESSIONAL APPOINTMENTS

<i>Harvard University</i>	2018–current
Assistant Professor of Chemistry & Chemical Biology	2015–2017
Faculty Associate, Harvard University Center for the Environment	
Member, Harvard Quantum Initiative	
<i>Northwestern University</i>	
Postdoctoral Associate (Advisor: Chad A. Mirkin)	
Research focus: DNA-mediated assembly of plasmonic nanoparticles	

EDUCATION

<i>University of California, Berkeley</i>	2010–2015
Ph.D. in Chemistry (Advisor: Jeffrey R. Long)	2005–2009
Thesis: Metal-Organic Frameworks for Gas Storage and Separation	
<i>University of Pennsylvania</i>	
M.S. in Chemistry (Advisor: Larry G. Sneddon)	
Thesis: The Development of Novel Borate Anions for Use as Electrolytes in Lithium-Ion Batteries	
B.A. <i>summa cum laude</i> in Chemistry (minors: Mathematics and Economics)	

RESEARCH INTERESTS

Synthesis of metal-organic materials with an emphasis on the development of strategies to control structure and porosity at multiple length scales; chemical approaches to manipulating entropy and

thermally induced phase transitions in extended solids and nanocrystal-based materials; design of materials for thermal energy storage, heat management, and solid-state cooling; melting and crystallization phenomena, metal-organic glasses; gas adsorption in porous solids; porosity and gas absorption in liquids.

AWARDS AND HONORS

Department of Energy Early Career Award	2020
Scialog Fellow for Negative Emissions Science	2020
George W. Merck Fellow	2020
Beckman Young Investigator Award	2019
Climate Change Solutions Fund	2019
Office of Naval Research Young Investigator Award	2019
Milton Fund Award	2018
Omar Farha Award for Research Leadership, Northwestern University	2016
International Institute for Nanotechnology Outstanding Research Award	2016
Reaxys PhD Prize Finalist	2016
Dan David Prize Postdoctoral Scholarship	2016
ACS Division of Inorganic Chemistry Young Investigator Award	2016
International Institute for Nanotechnology Postdoctoral Fellowship	2015
Chevron Research Fellowship	2014
Graduate Student Gold Award, Materials Research Society	2014
Glenn Award for the Division of Fuel Chemistry, American Chemical Society	2011
International Center for Materials Research Fellowship, Università Dell'Insubria	2011
National Science Foundation Graduate Research Fellowship	2009
Priestley Club Award, University of Pennsylvania	2009
Vagelos Science Challenge Award, University of Pennsylvania	2008
Phi Beta Kappa, University of Pennsylvania	2008
Hypercube Award for Computational Chemistry, University of Pennsylvania	2007
